

1. Please provide details of your current circumstances, including ties to family, community, employment, and economic circumstances. Outline and explain any academic or professional gap of more than six months

My name is **XXX**, and I chose to pursue a **Bachelor of Business (Accounting)** at **XXX** as it aligns with my academic interests and long-term career goals. It is a 3-year, 240-credit-point program that includes subjects such as Accounting for Decision Making, Financial Reporting, Management Accounting, Audit and Assurance, Taxation Law and many more. My parents currently work abroad, so I reside with my maternal grandfather, who supports my education and living expenses. Our annual family income is **XXX**, with savings of **XXX** dedicated to my study and living costs. We also have inherited assets, including property valued at **XXX**, and a stable family business, which strengthens our financial foundation. There is **no study gap**; after completing Grade XII in Aug 2025, I immediately joined **PTE classes** and sat for my PTE exam on **XXX**. I am committed to returning to Nepal to manage family assets, support my grandfather, and build my career.

2. Explain the reason you wish to study this course in Australia with ACU and your understanding of the requirements of the intended course and studying and living in Australia. You must outline the relevance of your previous studies and/or work experience. Please provide reason/s for not studying in your home country or region if a similar course is available there.

I chose the **Bachelor of Business (Accounting)** because it offers practical training in financial reporting, auditing, taxation, analytics, and modern digital accounting tools. This builds directly on my Grade XII Management background and strengthens the business foundation I developed during school. Nepal's accounting courses are mostly theoretical, lack IFRS-focused learning, updated software training, and structured internships, which would limit my professional growth. Australia provides industry-based education, strong student support, and better affordability compared to the USA, UK, or Canada. I selected **ACU** over VU and CQU due to its strong graduate outcomes, supportive environment, modern facilities, and available scholarships. The course structure covering auditing, financial systems, law, and analytics—matches my goal of becoming a skilled accountant in Nepal. I am aware that living expenses require about **XXX**, and I plan to stay in shared accommodation near ACU. After gaining global skills, I will return to contribute to Nepal's expanding financial sector.

3. Explain how completing the course will be of benefit to you. Identify specific positions you plan to apply for, potential future employers, and your expected salary. Demonstrate how you expect to receive a return on your investment

Completing the course at ACU will provide me with essential skills in financial reporting, auditing, taxation, budgeting, and business analytics, combined with practical exposure to modern accounting technologies and industry engagement. This globally recognized qualification will give me a competitive

advantage in Nepal, where employers increasingly value graduates with IFRS knowledge, digital accounting expertise, and hands-on experience. In the first 1–2 years after graduation, I expect to work as an **Accountant or Audit Assistant**, earning approximately **XXX**. With 3–5 years of experience, I aim to advance to **Senior Accountant or Audit Officer** roles, earning roughly **NPR 60K-90K/month**. By year 6–7, I plan to attain the position of **Accounting Manager or Financial Analyst**, with a monthly salary of **XXX** ([Accountant Salary in Nepal for 2026](#))

Based on these projections, I expect to recover my **XXX** investment within **5–7 years** after graduation. In the long term, I intend to launch Nepal's first **AI-powered digital financial literacy platform for SMEs**, combining my accounting knowledge with technological innovation to support business growth and financial inclusion.

4. Please provide any other relevant information that demonstrates that you are a genuine student. For more information, please refer to [Ministerial Direction No. 106](#).

Nepal's businesses and financial institutions are increasingly seeking professionals with strong accounting, auditing, and financial analysis skills, yet there is a shortage of experts trained in modern accounting technologies and international standards. This gap creates strong career opportunities for qualified accountants who can enhance financial management, compliance, and business efficiency. Studying at ACU will equip me with practical skills, industry exposure, and knowledge of global accounting practices, preparing me for a professional career in the corporate and banking sectors. Although studying abroad requires a significant financial investment, I view it as a long-term step to strengthen my professional competence. After completing my studies, I intend to return to Nepal to support my aging parents and apply my knowledge by implementing advanced accounting systems and improving financial reporting practices. In the long term, I aim to establish a consultancy to assist small and medium-sized enterprises in adopting modern accounting methods. I have no immigration history, except for a short visit to Japan in 2016. My sole purpose in Australia is education.

The following questions are only applicable for onshore applicants or those who have studied onshore in Australia before in Australia

5. Please provide details of your study history in Australia (include all courses studied, institution names and dates and previous visas held during this time).

N/A

6. For applicants who are currently holding a visa other than a Student visa – please explain your reasons for applying for a Student visa.
