

Addressing the Genuine Student Criterion

1. Please provide details of your current circumstances, including ties to family, community, employment and economic circumstances, and address any academic or professional gap of more than six months.
 - Briefly introduce yourself and your current situation
 - Explain your family situation, including their economic status
 - Include incentives to return such as assets, family business, land etc.
 - Address any study/employment gap

My name is **XXX**, residing in **XXX**, with my parents and grandmother. My father operates **XXX** and earns additional income through land leases. My mother is a senior accountant at a rose garden and party palace, while my grandmother receives an annual land lease income of **XXX**. Our family has stable finances, with a combined income of **XXX**, assets valued at approximately **XXX**, and an education loan of **XXX** from Global IME Bank. I completed my **bachelor's degree in food technology**, however, due to COVID-19-related delays, my certificate shows 2023. Since graduation, I have been preparing for further studies abroad. I received my offer letter on April 15, 2025. I plan to return to Nepal to contribute to our growing food industry and support the family business. There is no significant academic or employment gap.

2. Explain why you are not studying this course in your home country
 - Why Australia/WSU over other options
 - Demonstrate your understanding of the course
 - Demonstrate your understanding of living in Australia (costs, etc.)
 - Provide study and employment history and explain how your chosen course relates/builds on this

Nepal lacks globally recognized, research-driven postgraduate programs in food science that combine practical skills, innovation, and international food safety standards. I chose Australia for its high-quality education, multicultural society, and strong ties between academia and industry. **XXX** stood out for its affordability, industry-focused curriculum, and emphasis on hands-on learning. Master of Science (Food Science major) directly aligns with my background in food technology and covers key areas like food chemistry, processing, and quality assurance. I plan to live near **XXX**, in shared accommodation costing approximately 200-300 AUD/week, with an estimated annual living expense of around 29710 AUD. I understand the financial and lifestyle aspects of studying in Australia and am well-prepared to manage them. My academic background, combined with my interest in food innovation, makes this course an ideal step toward contributing to Nepal's food industry upon my return.

3. Explain how completing the course will be of benefit to you. Identify specific positions you plan to apply for, employers, and your expected salary.

Demonstrate how you expect to get your return on investment.

- Detail how this course will assist you to achieve your goals/give you advantages in the job market
- Explain your career goal – job type, companies/organizations you aim to work for, expected salary (based on research)
- Demonstrate how you expect to get a return on your investment (show costing, time to recover)

Master of Science (Food Science) at **XXX** will equip me with advanced technical knowledge and practical skills essential for Nepal's evolving food industry. This qualification will give me a competitive edge in areas such as food safety, quality assurance, and product development. My goal is to work with top food companies like Himalayan Snacks & Noodles or Dairy Development Corporation or expand our family's agricultural business by introducing innovative and safe food products. Entry-level food science professionals in Nepal typically earn NPR 40,000 to 640,000 per month, with potential for growth into higher-paying managerial or technical roles. With a total educational investment of approximately 140,000 AUD, I estimate I can recover the cost within 4–6 years through employment or entrepreneurial ventures in Nepal's food sector. This course is a strategic step toward long-term professional success and contributing to national food quality standards.

4. Please provide any other relevant information that demonstrates that you are a genuine student.

I am a genuine student with a strong academic foundation and a clear vision for my future. My decision to study at **XXX** is the result of thorough research and a strong alignment with my academic background and career aspirations in food science. I have stable financial support from my family, including assets and an education loan, ensuring I can fully fund my education and living expenses in Australia. I have no prior immigration history and am committed to returning to Nepal after completing my studies to apply my knowledge in the local food industry and help expand our family's agricultural business. My intention is purely academic and career-focused, demonstrating my genuine commitment to international education.
