

Addressing the Genuine Student Criterion

1. Please provide details of your current circumstances, including ties to family, community, employment and economic circumstances, and address any academic or professional gap of more than six months.
 - Briefly introduce yourself and your current situation
 - Explain your family situation, including their economic status
 - Include incentives to return such as assets, family business, land etc.

My name is **XXX**, born on **XXX** in **XXX, XXX**. After my father passed away in **XXX**, my mother, **XXX**, took over our family business and now earns through it and house rent, with an annual income of around **XXX**. My elder brother has also started working, supporting our financial stability. I completed Grade 12 in **XXX**, joined IELTS classes, and sat for the exam on **XXX**. I also completed a 3-month Python training at **XXX**, driven by my interest in technology. Our family owns land and property worth **XXX**, and we have taken an education loan of **XXX** from **XXX** to fund my studies. I have chosen the Bachelor of Information and Communications Technology at **XXX** for its practical, industry-focused curriculum. After graduation, I plan to return to Nepal and apply my IT skills to support and modernize our family business.

Explain why you are not studying this course in your home country

- Why **XXX / XXX** over other options
- Demonstrate your understanding of the course

Australia's education system offers modern, practical, and industry-focused programs—features often lacking in Nepal. I chose the Bachelor of Information and Communications Technology at **XXX** as it covers key IT areas like programming, cybersecurity, data management, and project management, along with real-world placements and certifications (e.g., Microsoft, Cisco). This program aligns with my background—I studied Computer Science in Grade 10, completed Grade 12 with Science and Mathematics, and completed a 3-month **XXX**, which deepened my interest in IT. Compared to other universities in **XXX**, **XXX** smaller class sizes, supportive environment, and personalized learning approach suit my style. I aim to become a full-stack developer, and this program offers the right foundation. I have budgeted **XXX** annually and plan to live in a shared house near campus for convenience and affordability.

3. Detail how this course will assist you to achieve your goals/give you advantages in the job market.

Bachelor of Information and Communications Technology (ICT) at **XXX** will equip me with essential skills in software development, database management, cybersecurity, and overall system design—key areas needed to succeed as a full-stack developer. I am passionate about working as a software developer in leading Nepali tech companies such as **XXX, XXX**, and **XXX**. This internationally recognised degree

will provide me with a strong competitive edge in Nepal's job market, where skilled IT graduates with international qualifications are in high demand. After completing my studies, I plan to gain practical experience through the Post-Study Work (PSW) visa in Australia, allowing me to enhance my technical and workplace skills. Upon returning to Nepal, I expect to earn around **XXX** per year as a software developer, based on current market data. With steady career growth and proper financial planning, I am confident I will recover my educational investment within 6 to 7 years.

Information that demonstrates that you are a genuine student. For more information, please refer to **Ministerial Direction No. 106**

As an international graduate, I understand that employers value innovative and practical IT skills, and I plan to use this advantage to contribute meaningfully upon my return to Nepal. My goal is to become a full-stack developer and software developer, enabling me to apply modern digital solutions to real-world problems. As the youngest in my family, I share a close bond with them and feel a strong responsibility to support and care for them. Nepal's growing demand for internationally trained IT professionals presents excellent career opportunities, and I am confident that the skills I gain abroad will help modernize and digitize our family business, making it more efficient and competitive. Although I am currently single, I plan to build my future and raise a family in Nepal. The country's improving IT sector and digital economy motivate me to contribute to national development. I have never visited Australia or any other country before.
