

Questions to address the Genuine Student Criteria, maximum 150 words per question.

This is an opportunity to demonstrate your intention to study in Australia with the **XXX**. From 23 March 2024, the Australian Government's Department of Home Affairs reviews prospective applicants based on Genuine Student (GS) requirements as part of the student visa application process. All applicants for a student visa must demonstrate they satisfy the Genuine Student (GS) criteria as part of the assessment. You will need to address the below questionnaires instead of a Statement of Purpose and demonstrate your personal circumstances for undertaking the proposed study in Australia.

This form should be completed using the pdf editor version to allow some feedback; alternatively, please use the Microsoft Word document.

1. Details of your current circumstances, including ties to family, community, employment and economic circumstances.

Must demonstrate: personal ties to home country & reason for not studying in the home country if a similar course is available, etc

I am **XXX**, a motivated individual with a bachelor's degree in computer science and engineering from **XXX**. My career began with an internship in the IT department from July to December 2023, where I gained practical experience and improved my technical skills. In March 2024, I joined **XXX** as a Software Developer. My expertise includes data analysis, software engineering, and artificial intelligence. I am dedicated to learning and growing, actively pursuing internships and roles during my studies. My family has a stable financial background, supported by my mother's business, my father's salary, and rental income. I researched Master of Data Science programs in Nepal, like those at **XXX** and **XXX**, but found they lack job-oriented training, advanced AI, and data science studies, as well as proper facilities. This has encouraged me to seek higher education abroad.

2. Explain why you wish to study this course in Australia with the University of Southern Queensland and also your understanding of the requirements of the intended course and studying and living in Australia.

Must demonstrate: research conducted on UniSQ specifically: location, program, tuition and program outcomes, living arrangements and financial stability etc

I have chosen to study in Australia because of its high-quality education, modern infrastructure, stable political environment, and multicultural society. I plan to pursue a Master of Data Science specializing in AI and Machine Learning at the **XXX**. This two-year program costs **XXX** per year and consists of 16 units, including 12 core and 4 elective or research training courses. UniSQ is known for its strong curriculum and industry connections, offering excellent opportunities for professional growth. The program aligns perfectly with my background in Computer Science and my work experience as a Software Developer and IT Intern, particularly in areas like data analysis and machine learning. I have also researched accommodation options, both on-campus and off-campus, with weekly costs ranging from **XXX**. These options ensure a comfortable and supportive living environment during my studies.

3. Explain how completing the course will be of benefit to you.

Must demonstrate: study relevance and improve employment prospects in the home country

Completing a Master of Data Science will equip me with vital skills for roles such as Data Scientist or Machine Learning Engineer. I aim to work at leading companies in Nepal, like **XXX, XXX, XXX XXX**, airlines, and banks, where salaries range from **XXX** per year based on experience. Additionally, freelancing opportunities on platforms like Upwork offer rates of \$25-40 per hour, providing a flexible income stream. The program's focus on data analysis, machine learning, and artificial intelligence is aligned with current industry demands and includes practical projects and internships to boost employability. While the total estimated cost for studying in Australia, including tuition and living expenses, is around **XXX**, I believe it is a worthwhile investment. With the high earning potential in data science, I expect to recoup this within 4-5 years, while the skills and connections gained will support my long-term career growth.

4. Please provide details of any other relevant information to support your application.

Must demonstrate: applicant or applicant's dependent/s visa history to Australia or any other countries or any other important matter

As a genuine student, I am fully committed to returning to Nepal after completing my studies at the **XXX**. My goal is to apply the knowledge and skills gained to contribute to the growth of Nepal's data science industry and support my family. I have significant responsibilities back home, including overseeing our family business and managing properties valued at **XXX**. With my parents relying on me, it is crucial for me to return promptly after my studies to fulfill these obligations and give back to my community, helping drive sustainable development and progress. I completed my bachelor's degree in India, where a visa was not required for education. As a result, I do not have any prior immigration history.

5. Applicants currently in Australia and intend to apply for a student visa: Please provide details of your reason for a change of program or provider, your study record in Australia, visa history and any non-compliance visa activities, if applicable.

Must demonstrate: reason for change of program or provider, detail study record in Australia, study gaps for more than 2 months in the academic year & visa compliance

Not Applicable
